

IN THE CLAIMS:

This listing of claims will replace all prior versions and listings of claims in the application:

1. (Currently Amended) ~~A colonie~~ An overtube as claimed in claim 23
wherein for maintaining a section of a colon in a straightened configuration, the
~~overtube having a proximal end for location externally of a colon, a distal end for~~
~~insertion into a colon, and a colonoscope lumen extending therethrough for passing the~~
~~overtube over a colonoscope;~~

at least portion of the overtube ~~being~~ is laterally flexible to facilitate flexing of the
overtube substantially without kinking during advancement of the overtube through a
colon.

2. (Original) An overtube as claimed in claim 1 wherein the laterally flexible
portion of the overtube extends along the entire length of the overtube.

3. (Original) An overtube as claimed in claim 1 wherein the overtube has
more than one laterally flexible portion spaced along the overtube.

4. (Original) An overtube as claimed in claim 1 wherein the laterally flexible
portion is provided by at least one corrugation.

5. (Original) An overtube as claimed in claim 4 wherein the corrugation
extends along the overtube in a convoluted manner.

6. (Original) An overtube as claimed in claim 4 wherein the corrugation extends at least partially circumferentially around the overtube.

7. (Original) An overtube as claimed in claim 4 wherein the overtube comprises a plurality of corrugations.

8. (Original) An overtube as claimed in claim 4 wherein the corrugation is provided on an interior surface of the overtube.

9. (Currently Amended) An overtube as claimed in claim ~~[[1]]~~ 23 wherein an exterior surface of the overtube is smooth.

10. (Currently Amended) An overtube as claimed in claim ~~[[1]]~~ 23 wherein the overtube comprises a coating of a lubricious material.

11. (Currently Amended) An overtube as claimed in claim ~~[[1]]~~ 23 wherein the overtube comprises a composite material.

12. (Original) An overtube as claimed in claim 11 wherein the overtube is of a layered construction.

13. (Currently Amended) An overtube as claimed in claim 11 wherein the overtube comprises a reinforcement ~~means~~ element.

14. (Currently Amended) An overtube as claimed in claim 13 wherein the reinforcement ~~means~~ element is embedded in the overtube.

15. (Currently Amended) An overtube as claimed in claim 13 wherein the reinforcement ~~means~~ element comprises a coil.

16. (Currently Amended) An overtube as claimed in claim 13 wherein the reinforcement ~~means~~ element comprises a mesh.

17. (Currently Amended) An overtube as claimed in claim 13 wherein the reinforcement ~~means~~ element is of a braided construction.

18. (Currently Amended) An overtube as claimed in claim 13 wherein the reinforcement ~~means~~ element is of a metallic material.

19-22. (Cancelled)

23. (Currently Amended) A colonic overtube for maintaining a section of a colon in a straightened configuration, the overtube having a proximal end for location

externally of a colon, and a distal end for insertion into a colon, and a colonoscope lumen extending therethrough for passing the overtube over a colonoscope;

the overtube comprising a flexible seal at the distal end for sealing between the overtube and a colonoscope extending through the colonoscope lumen;

the seal being mounted to an exterior surface of the overtube, and the seal extending inwardly to seal between the overtube and a colonoscope extending through the colonoscope lumen.

24. (Original) An overtube as claimed in claim 23 wherein the seal comprises a film material.

25. (Original) An overtube as claimed in claim 24 wherein the seal comprises a sheath of film material.

26. (Original) An overtube as claimed in claim 23 wherein the seal comprises an inner sealing layer and an outer sealing layer around the inner sealing layer.

27-28. (Cancelled)

29. (Original) An overtube as claimed in claim 23 wherein the seal extends distally of the distal end of the overtube.

30. (Currently Amended) ~~A colonie~~ An overtube as claimed in claim 23 wherein
~~for maintaining a section of a colon in a straightened configuration, the overtube having~~
~~a proximal end for location externally of a colon, a distal end for insertion into a colon,~~
~~and a colonoscope lumen extending therethrough for passing the overtube over a~~
~~colonoscope;~~

the overtube ~~being~~ is of a material which is thermally stable in use.

31. (Original) An overtube as claimed in claim 30 wherein the overtube is of
polytetrafluoroethylene.

32. (Currently Amended) An overtube as claimed in claim ~~[[30]]~~ 23 wherein
the overtube is extendable between a shortened configuration and an elongated
configuration for cannulating at least portion of a colon.

33. (Cancelled)

34. (Currently Amended) An overtube as claimed in claim ~~[[33]]~~ 32 wherein in
the shortened configuration at least portion of the overtube is retracted in a concertina-
like manner.

35. (Currently Amended) An overtube as claimed in claim ~~[[33]]~~ 32 wherein
the overtube comprises a plurality of overtube sections which are movable relative to
one another to extend the overtube to the elongated configuration.

36. (Cancelled)

37. (Currently Amended) An overtube as claimed in claim ~~[[33]]~~ 32 wherein the overtube comprises an actuator to extend the overtube in situ to the elongated configuration.

38. (Original) An overtube as claimed in claim 37 wherein the actuator may be activated from externally of a colon.

39. (Original) An overtube as claimed in claim 38 wherein the actuator comprises a connector for extending from the overtube within a colon to a location externally of the colon.

40. (Original) An overtube as claimed in claim 39 wherein the connector extends from the distal end of the overtube.

41. (Original) An overtube as claimed in claim 39 wherein the connector is anchored to the overtube.

42. (Original) An overtube as claimed in claim 39 wherein the connector comprises a drawstring.

43. (Original) An overtube as claimed in claim 42 wherein the drawstring is configured to be looped through a working channel of a colonoscope to a location externally of a colonoscope.

44. (Currently Amended) An overtube as claimed in claim ~~[[1]]~~ 23 wherein the overtube comprises a rounded tip at the distal end for atraumatic advancement of the overtube through a colon.

45. (Original) An overtube as claimed in claim 44 wherein the tip is mounted to the overtube.

46. (Original) An overtube as claimed in claim 45 wherein the tip is mounted to an exterior surface of the overtube.

47. (Original) An overtube as claimed in claim 46 wherein the tip extends around the distal end of the overtube at least partially into the colonoscope lumen.

48. (Currently Amended) An overtube as claimed in claim ~~[[1]]~~ 23 wherein the overtube comprises at least one exchange lumen for exchange of fluid and/or a medical device through the lumen.

49. (Original) An overtube as claimed in claim 48 wherein the overtube comprises means to view a colon distally of the overtube, the viewing means being at least partially provided in the exchange lumen.

50. (Original) An overtube as claimed in claim 48 wherein the overtube comprises means to insufflate a colon, the exchange lumen providing an insufflation channel.

51. (Original) An overtube as claimed in claim 48 wherein the overtube comprises means to flush a colon, the exchange lumen providing a flushing channel.

52. (Original) An overtube as claimed in claim 48 wherein the overtube comprises means to illuminate a colon, the illumination means being at least partially provided in the exchange lumen.

53. (Currently Amended) An overtube as claimed in claim ~~[[1]]~~ 23 wherein the overtube comprises a limiting means element to prevent complete insertion of the overtube into a colon.

54. (Currently Amended) An overtube as claimed in claim 53 wherein the position of the limiting ~~means~~ element on the overtube is adjustable.

55. (Currently Amended) An overtube as claimed in claim 53 wherein the limiting ~~means~~ element is releasably mounted to the overtube.

56. (Currently Amended) An overtube as claimed in claim 55 wherein the limiting ~~means~~ element is threadably mounted to the overtube.

57. (Currently Amended) An overtube as claimed in claim 53 wherein the limiting ~~means~~ element comprises a flange.

58. (Currently Amended) An overtube as claimed in claim ~~[[1]]~~ 23 wherein the overtube has a discontinuous interior surface for ease of passage of the overtube over a colonoscope.

59. (Original) An overtube as claimed in claim 58 wherein the overtube comprises one or more inwardly projecting elements on the interior surface for contacting a colonoscope.

60. (Original) An overtube as claimed in claim 59 wherein the projecting element comprises a corrugation.

61. (Original) An overtube as claimed in claim 59 wherein the projecting element comprises a protruding strip.

62. (Original) An overtube as claimed in claim 60 wherein the projecting element extends longitudinally along the overtube.

63. (Original) An overtube as claimed in claim 60 wherein the projecting element extends at least partially circumferentially around the overtube.

64. (Original) An overtube as claimed in claim 60 wherein the projecting element extends along the overtube in a convoluted manner.

65. (Original) An overtube as claimed in claim 59 wherein the projecting element comprises a plurality of discrete protrusions.

66. (Cancelled)

67. (Currently Amended) A method of performing a colonoscopy procedure, the method comprising the steps of: –

inserting a colonoscope into a colon and advancing the colonoscope through at least part of the colon;

straightening a section of the colon;

advancing a colonic overtube over the colonoscope to maintain the section of the colon in a straightened configuration;

advancing the colonoscope to a point distally of the straightened section of colon;
and

advancing the overtube over the colonoscope to a point distally of the
straightened section of colon by extending the overtube from a shortened configuration
to an elongated configuration.

68. (Original) A method as claimed in claim 67 wherein the method comprises
the step of withdrawing the colonoscope from the colon while the overtube remains in
place in the colon.

69. (Original) A method as claimed in claim 68 wherein the method comprises
the step of advancing a medical device through the overtube to access a point in the
colon distally of the straightened section of colon.

70. (Original) A method as claimed in 67 wherein the method comprises the
step of mounting the overtube to the colonoscope before inserting the colonoscope into
the colon.

71. (Cancelled)

72. (Original) A method as claimed in claim 67 wherein the overtube is
advanced by pushing the overtube from externally of the colon.

73. (Original) A method as claimed in claim 67 wherein the section of colon
being straightened is the sigmoid colon.

74. (Original) A method as claimed in claim 67 wherein the overtube is advanced to a point distally of the descending colon.

75. (New) A colonic overtube for maintaining a section of a colon in a straightened configuration, the overtube having a proximal end for location externally of a colon, and a distal end for insertion into a colon, and a colonoscope lumen extending therethrough for passing the overtube over a colonoscope;

the overtube comprising a flexible seal at the distal end for sealing between the overtube and a colonoscope extending through the colonoscope lumen;

the seal comprising an inner sealing layer and an outer sealing layer around the inner sealing layer.

76. (New) A colonic overtube having a proximal end for location externally of a colon, a distal end for insertion into a colon, and a colonoscope lumen extending therethrough for passing the overtube over a colonoscope;

the overtube being extendable between a shortened configuration and an elongated configuration for cannulating at least portion of a colon;

the overtube comprising an actuator to extend the overtube in situ to the elongated configuration;

the actuator being activatable from externally of a colon;

the actuator comprising a connector for extending from the overtube within a colon to a location externally of the colon;

the connector comprising a drawstring.

77. (New) An overtube as claimed in claim 76 wherein in the shortened configuration at least portion of the overtube is retracted in a concertina-like manner.

78. (New) An overtube as claimed in claim 76 wherein the overtube comprises a plurality of overtube sections which are movable relative to one another to extend the overtube to the elongated configuration.

79. (New) An overtube as claimed in claim 76 wherein the connector extends from the distal end of the overtube.

80. (New) An overtube as claimed in claim 76 wherein the connector is anchored to the overtube.

81. (New) An overtube as claimed in claim 76 wherein the drawstring is configured to be looped through a working channel of a colonoscope to a location externally of a colonoscope.
